Profile

Detail-oriented MEAN Stack Developer with a strong foundation in building scalable, full-stack web applications. Proficient in designing robust backends with Node.js/Express.js and creating dynamic, responsive user interfaces using Angular and TypeScript. Experienced in database modeling with MongoDB, RESTful API development, and modern architectural principles. Eager to leverage problem-solving skills to build high-quality software solutions in a dynamic team environment.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend (Client)	Angular, RxJS, NgRx, Angular Material, Bootstrap, EJS
Backend (Server)	Node.js, Express.js, NestJS, RESTful APIs
Databases	MongoDB, Mongoose, PostgreSQL
Cloud & Deployment	AWS (EC2), Nginx, PM2
Tools & Practices	Git, GitHub, Postman, Angular CLI, npm, OOP, SOLID Principles, DSA

Projects

Recruitment Platform

[Live Link](#) | [GitHub](#)

A scalable recruitment platform for managing job applications, interviews, and candidate assessments.

- Built utilizing a modern MEAN architecture: Angular (frontend), Node.js + NestJS (backend), and MongoDB.
- Designed a robust role-based access control (RBAC) system for Global Admins, Companies, HRs, and Candidates.
- Implemented ATS-friendly resume filtering, a four-level interview workflow, and real-time progress tracking.
- Applied SOLID principles to ensure maintainable, modular, and scalable server-side code.

E-Commerce Website

[Live Link](#) | [GitHub](#)

A complete e-commerce platform with full user and administrative functionalities.

- Developed full-stack application using Node.js, Express.js, MongoDB, and EJS templates.
- Implemented JWT authentication, product cataloging, cart management, and Razorpay payment gateway integration.
- Created a comprehensive admin dashboard for managing products, categories, brands, and generating sales reports.
- Integrated advanced features including a digital wallet system and dynamic order tracking.

UMS Application (Mini Project)

[GitHub](#)

A User Management System showcasing state management and CRUD operations.

- Engineered frontend using Angular and utilized NgRx for predictable state management.
- Built backend APIs with Node.js and TypeScript to handle user data and authentication.
- Implemented seamless profile management features including secure image upload functionality.

Experience

Accountant

2023 – 2024

Sree Gokulam Motors and Service

Kattappana, Kerala

- Managed financial records, cash flow, and property accounts with high attention to detail.
- Prepared detailed financial reports and statements using Tally ERP9 and Tally Prime.
- Ensured regulatory compliance by handling e-way bill generation and timely GST filings.

Education

Full Stack Development (MEAN Stack)

2024 – Present

BroTOTYPE, Kerala (In Progress)

Intensive training in modern web technologies including JavaScript, Node.js, Express, MongoDB, Angular, NgRx, SQL, and DSA. Actively building industrial-level full-stack applications.

Bachelor of Commerce in Cooperation

2019 – 2022

St. Sebastian's College, Kattappana, Kerala

Higher Secondary Education (Commerce with Computer Applications)

2017 – 2019

St. Sebastian's Higher Secondary School, Kattappana, Kerala
